

Fig. 1

After the first step, the H<sub>2</sub> gas is used in the second step to reduce the catalyst.

Fig. 2

[illegible]

Fig. 3

Fig. 4

the first two peaks are due to the presence of the two main components of the sample, the first peak being due to the presence of the first component and the second peak being due to the presence of the second component.

Fig. 5

the first two peaks are due to the presence of the solvent and the third peak is due to the presence of the sample.
